

ESP41x

RS-232/422/485 to Ethernet Serial Server

- ✓ Easy to Use and Configure – Software Included
- ✓ Data Rates up to 230 Kbps
- ✓ 1, 2, or 4 Port Versions Available
- ✓ Supports RS-232, RS-422, and 2-Wire/4-Wire RS-485
- ✓ Supports Virtual COM Port, Direct IP, and Paired Modes

These commercial grade serial to Ethernet converters allow you to control serial devices located virtually anywhere, through a TCP/IP or UDP/IP Ethernet connection. They are equipped with one, two or four serial port connections on one side, and a 10/100 Mbps Ethernet connection on the other side, allowing you to easily connect legacy or new serial devices to your Ethernet network. Installation and configuration is quick and easy with the VLinX™ Manager Software provided on CD ROM. The software is compatible with Window 2000, 2003 Server, XP, and Vista. It is powered from a 12 VDC power supply (included with the unit). Power supply options for US, UK, and EU are available. With three operating modes to select from; Virtual COM Port, Straight IP, & Paired, you can easily network enable any RS-232/422/485 device. RS-485 supports both 2-Wire and 4-Wire modes.

- IEEE 802.3U 10/100BaseT, auto-detecting
- TCP Server, TCP Client, or UDP
- Direct IP, Paired, or Virtual COM
- TCP Probe – Automatically restores connection in Virtual COM mode
- Data rates up to 230 Kbps
- Power Supply Included
