

**Model: WPC11**  
**Connect Your Notebook Computer  
 to Wireless Networks!**

**Wireless-B Notebook Adapter**

The Wireless-B Notebook Adapter lets your notebook communicate with the popular 802.11b wireless network standard. 802.11b wireless networks are found in corporate environments, and are used in homes for household Internet connectivity without the need for running cables. They're also popping up all over the country in coffee shops, airports, hotels, convention centers, and other public spaces offering "on-the-go" connectivity to mobile users.

The included Setup Wizard will walk you through configuring the Adapter to your network's settings, step by step. Then just slide it into your notebook's PC Card slot and enjoy network access with your notebook computer, while retaining true mobility.

Once you're connected, you can keep in touch with your e-mail, access the Internet, and share files and other resources such as printers and network storage with other computers on the network, wherever you wander. At home, you can surf the web or use instant messaging to chat with friends while sitting out on the patio. To protect your data and privacy, the Wireless-B Notebook Adapter can secure all wireless transmissions with up to 128-bit data encryption.

Join the wireless revolution. With the Wireless-B Notebook Adapter, you'll be ready to connect to the wireless world, wherever you go.
