

Create a USB Network from your PCs

Model EZLINK

No New Interface to Learn

The EZ-Link network uses all of the familiar Microsoft Windows 9X interface such as Windows and Windows Desktop. There is no new software for the user to learn. The EZ-Link network supports all of the built-in Windows networking capabilities. This means that users can share files, printers, and disk drives as well as use the Windows network security system.

High Performance and Low Cost

Running at 3 Megabits/second EZ-Link provides users with a 30X-performance improvement over serial cables. This is effectively the same performance, as a user would experience in an actual Ethernet-based network. With an EZ-Link network, users don't have to purchase, install, and configure network cards and equipment. As a result they end up saving time and money.

Applications

- Perfect for SOHO networks
- Easy file, printer and other peripheral sharing
- Global hard disk transfer
- Multiplayer gaming

Features

- Simple and fast installation
- High-speed USB bandwidth
- Up to 10-meter length
- Supports USB networks of up to 16 PCs
- Hot-swapping
- True plug-n-play compatibility
- Uses standard Windows Explorer user interface
- Supports full Microsoft network security

Technical Specifications

- Bus powered from the USB port.
- 12" attached A-male cable
- 3-meter A-male to B-male cable
- Dimensions: 3.4" x 1.8" x 1.1"
