## Latest Catalog Debuts Over 250 New Industrial Communication Products

Ottawa, IL – B&B Electronics Manufacturing Company's first catalog of 2010 showcases hundreds of new, industrial-grade, data communication products.

Exclusively from B&B Electronics, new Ilinx™ hardened converters and repeaters meet stringent IEC 61850-3 and IEEE1613 specifications for electrical substations. New Vlinx™ Ethernet to serial servers enable control of serial devices located virtually anywhere via TCP/IP or UDP/IP Ethernet connections.

Also new to the January 2010 issue are a coaxial Ethernet extender and remote access modem, plus mini Ethernet serial servers, USB isolators and hubs, Fiber and USB converters, cellular routers, integrated controllers, LCD monitors, PC touch panels, and power supplies.

The 140-page issue also features B&B Electronics' standard line-up of serial conversion products, Ethernet serial servers, switches and gateways, wireless products, plus USB and remote I/O devices. Non-metal enclosures, terminal blocks, power supplies, cabling, and surge protectors are also available. As a direct to end-user provider, B&B Electronics has historically been known for competitive prices.

Designing, customizing, and manufacturing products since 1981, B&B Electronics Manufacturing Co., Inc. provides industrial automation and device networking solutions. The company is known globally as a one-stop source for rugged, reliable data communication products, with full technical support, reputable customer service, and same-day shipping.

For more information about B&B Electronics Manufacturing Co. Inc., or to receive a catalog, visit [www.bb-elec.com](http://www.bb-elec.com) or call 1-800-346-3119.
